Hugo: Up & Away

Game Rules

Version history

Version	Date	By	Changes
0.1	20/07/2022	LM	First draft

Hugo: Up & Away is a player-determined volatility, real-time, multiplayer, crash game with max wins up to 2,500X!

Get onboard with our favourite troll Hugo as he escapes on his plane with a cargo hold full of Scylla's jewels. A multiplier steadily increases their value the further Hugo travels!

Flying through a treacherous thunderstorm, Hugo is seen piloting the plane through a sky littered with thunderous clouds and explosive TNT balloons.

Beware of the fatal lightning which can strike at any time as it'll put a stop to our hero's journey. Choose when to parachute from the plane to safety and earn the rewards!

An intense adrenaline rush, but simple to play, play up to two bets each round or employ strategy using the auto-eject options for sky-high wins.

Return To Player (RTP): **94%**
A player's level of skill does not influence the short and long term return (RTP) of the game.

GAME RULES

The game is all about making the decision when to jump off the plane before lightning fatally strikes.
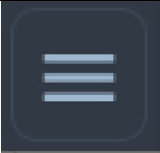

- The betting phase displays a countdown showing the time remaining to place bets for the next round and when it will begin.
- Two bets can be set for a game round using the BET selectors. The total amount that can be bet in a round is the combination of the two BET amounts up to a maximum of 100.
- The bet list is dynamic and will only show remaining amounts from a total bet of 100 across the two possible bets.
- AUTO allows an auto-eject value to be set for each BET. This then plays the round and if the specified MULTIPLIER is reached by the plane, the player will automatically eject from the plane and parachute to safety.
- If an AUTO is set, the BET amount will default to the lowest BET amount until changed.
- Either BET selector can have an AUTO value set.
- Clicking the COLLECT button for a BET will end the specific bet in flight and return the win amount shown.
- If a collect happens at the same time the plane is damaged, the win amount for that bet will be awarded.
- An AUTO value will be cancelled for the specified bet when the COLLECT button is clicked.
- If the plane is damaged and any active bets are unclaimed they will not be returned.
- If the plane is damaged, the winning presentation for any players who exited the plane is shown before resuming the next betting phase.
- The history of the last twenty multiplier values reached by the plane is shown on the right of the screen.

- Winnings are based on the MULTIPLIER shown for the plane at the time the active BET is collected.
  - The winning amount of the active bet is the MULTIPLIER * the active BET amount.
  - The minimum multiplier to payout is 1.01x. The maximum multiplier to payout is 2500x.
  - If the plane is damaged and the multiplier is less than 1.01x no winnings will be awarded.
  - If the maximum multiplier is reached by the plane, auto eject will be triggered for active bets and the win amount awarded.
  - If more than 1 active bet is won, the winnings are added up.

GAME FUNCTIONS

	BET BUTTON Click to open a list of bet amounts to set for the specified bet.
	AUTO EJECT BUTTON Click to open a list of multiplier amounts to set to auto-eject from the plane for the specified bet.
